

Smart Study Planner(AI Based)

Name: Sananda Bhowmik

Reg. No.: 25BAI11406

AIML Project

Problem Statement

Students struggle to manage time and prioritize subjects effectively.

Solution

A Smart Planner that generates daily study schedules based on priorities,time,and exam dates.

Feature

- Priority-based scheduling
- Exam-based planning
- Automatic revision days
- Web interface

Technology Used

- Python
- Streamlit
- Datetime module
- GitHub

Algorithm

- Priority sorting
- Time allocation
- Schedule before deadlines
- Revision planning

Input Interface

 **Smart Study Planner**

Plan your studies smartly with priority and revision scheduling!

Enter number of subjects

- +

Subject 1 name

Number of topics in Math

- +

Math - Topic 1

Priority for Differentiation

▼

Math - Topic 2

Priority for Integration

▼

Exam date for Math

Subject 2 name

Number of topics in Chemistry

- +

Chemistry - Topic 1

Priority for Thermodynamics

▼

Exam date for Chemistry

Study hours per day

4

Output Study Plan

Your Study Plan

 **2026-03-26**

 Math - Integration (4 hrs) [ High]

 **2026-03-27**

 Math - Integration (2 hrs) [ High]

 Math - Differentiation (2 hrs) [ Medium]

 **2026-03-28**

 Math - Differentiation (2 hrs) [ Medium]

 Chemistry - Thermodynamics (2 hrs) [ Medium]

 **2026-03-29**

  Math - Revision

 **2026-03-30**

  Math - Revision

 **2026-03-31** 

 Chemistry - Thermodynamics (2 hrs) [ Medium]

 **2026-04-01**

  Chemistry - Revision

 **2026-04-02**

  Chemistry - Revision

Future Scope

- Progress tracking
- AI recommendations
- Mobile app version
- Enhanced UI
